DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. **The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.** The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3723

4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

Regarding claims 1, 4, 8, and 9, the phrase "or" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

The following examples are some of the phrases in the claims that are vague, indefinite, and/or awkwardly and confusingly worded:

I. "A rotary device.....gear, which comprises:" (claim 1, lines 1-5). It is unclear from the preamble what is being claimed as the invention. Is it the rotary device or the reduction gear?

II. "the circumference" (claim 1, line 7). Lacks proper antecedent basis.

III. "the rotation" (claim 1, line 9). Lacks proper antecedent basis.

IV. "an externally contacting shaft" (claims 2 and 8, line 3). Is this shaft, the same shaft of claim 1, lines 5-6?

V. "a plurality.....shafts" (claims 2 and 8, lines 4-5). Are these shafts, the same shafts of claim 1, line 6?

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

6. Claims 1-10 are rejected as best understood by the examiner under 35 U.S.C. 102(e) as being anticipated by Nakamura et al.

Nakamura discloses a rotary drive device of a polishing device comprising: a reduction gear (69).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
